VALO TECHNOLOGIES LLC

Cisco & Palo Alto network security engineering

CAPABILITY STATEMENT

UEI ZWY2EB1Q75C4 | CAGE 0QMV2

NAICS 541512 (primary)

COMPANY OVERVIEW

VALO Technologies provides network security engineering, cybersecurity risk assessments and technology procurement for managed service providers, small and midsize businesses, and state, local and education (SLED) organizations. Consulting and product resale are offered as separate engagements.

CORE COMPETENCIES

- **Firewall migration & implementation.** Migrations, configuration changes, VPN deployments and cutovers, each with rollback and validation steps.
- **Firewall assessment & optimization.** Policy, NAT, segmentation and access review with prioritized findings and a cleanup plan.
- **Network segmentation & security engineering.** Segmentation, Cisco switching and routing, and security remediation.
- **Cybersecurity risk assessments.** Vendor-neutral, engineer-led review with risk-ranked findings, a risk register and a remediation roadmap.
- **MSP white-label engineering.** Cisco and Palo Alto engineering capacity delivered under the MSP's brand; scope agreed before work begins.
- **Technology procurement.** Eligible Cisco and Palo Alto Networks hardware, software, subscriptions and licensing through Ingram Micro, kept separate from consulting.

DIFFERENTIATORS

- Principal-led: the engineer who scopes the work does the work.
- Vendor-neutral assessments; products recommended only when they fit a requirement.
- Defined scope, deliverables and handover on every project; no managed-service commitment required.
- Direct engagements and white-label support for MSPs.

FOUNDER EXPERIENCE (PRIOR ROLES)

- Senior network security engineering across Department of Defense (Brooke Army Medical Center), state public health, financial services and county government environments.
- Remediated 150+ Palo Alto firewall rules in an enterprise policy cleanup.
- Hardened enterprise Cisco switches against Rapid7 findings, confirmed by follow-up scanning.

COMPANY DATA

UEI: ZWY2EB1Q75C4

CAGE: 0QMV2

NAICS: 541512 (primary)

Location: Dallas, Texas

Identifiers only; they do not imply a contract award or set-aside status.

PARTNER DESIGNATIONS

- Cisco Registered Partner
- Palo Alto Networks NextWave Registered Reseller
- Fortinet Engage Advocate Partner (Integrator)
- Distribution through Ingram Micro

CUSTOMERS SERVED

- Managed service providers (MSPs)
- Small & midsize businesses
- State, local & education (SLED)

FOUNDER CREDENTIALS

CCNP Enterprise · PCCSE · CISM · CompTIA SecurityX · CySA+

M.S. Cybersecurity & Information Assurance

MBA, IT Management

Individual credentials, not company certifications.
